DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action or the MPEP.

Double Patenting

Claims 1-7, 9-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,676,969.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the patent and the instant claims are directed to the resorbable extracellular matrix consisting essentially of purified collagen II derived from natural cartilage tissue including the glycosaminoglycan material. Although the claims have some different limitations, the claims are close in scope, which warrants this rejection. For example, claim 3 of this application closely matches claim 1 of the patent; claim 7 of this application closely matches claim 2 of the patent; and claim 9 of this application closely matches claim 3 of the patent.

Priority

In the previous office action, it was stated that the "disclosure of the prior-filed application, Application No. 09/986,757 (USPN 6,676,969 B2), failed to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application."

In view that this application is a continuation-in-part (not a continuation) of the '969 patent, this rejection is being withdrawn. The priority claim is acceptable.

Allowable Subject Matter

Claims 1-7, 9-12 would be allowed if a terminal disclaimer as required above were filed.
